# OUR PRODUCTS

## Multi Turn Interlock

- 3 sizes
- Solution for all operations
- Parallel splined HW Connection

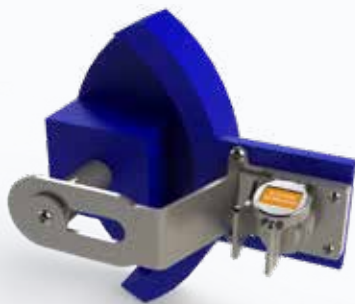

## Quarter Turn Interlock

- 3 sizes
- Sliding or fixed levers
- ISO & Non-ISO footprint suitable

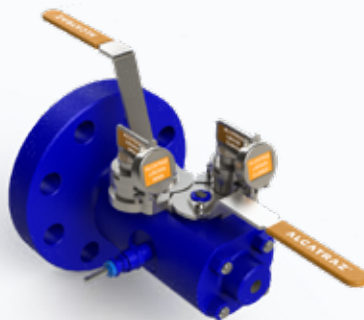

## Special Applications

- Cryogenic & more
- Bespoke Mounting solutions
- Switch / Sensor integration

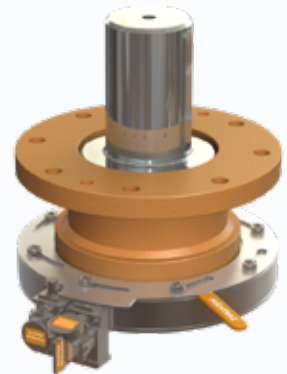

## Closure Door Interlock

- Compact & Robust solution
- Available Solenoid, Switch & sensor integration
- Solution for all type of doors

## Double Block and Bleed

- Multi & Quarter Turn solutions
- Compact
- Direct control

## George

- Partial Stroke Testing
- ESD Function Control
- Maintenance Process Safety

### Direct Actuated Valve Interlock

- Control, Checking & Isolation
- Electric, Pneumatic & Hydraulic
- Integrated Control

### Digital Key Control

- Communication to your DCS / PLC
- Store, Detect & Control
- Flexible to Clients requirements

### Key Exchange & Timer

- Mechanical & Digital Time delays
- Solenoid, Push Button, Switches & Sensors
- Configuration fully adaptable

### Sequence Control Units

- Linear & Non-Linear sequences
- Light, Compact & Weatherproof
- Digital integration available

### ExD Key Control Cabinet

- Suitable for all Process Zones
- Full Range of Atex Certifications
- Client bespoke configurations

### Key Management Interfaces

- Store
- Control
- Intelligence

### Instrumentation Interlock

- 1 out 3 applications
- Manifolds, Needle Valves
- Compact

### Door locks

- Hatches, Latches, Doors
- Universal mounting footprint
- Interfaces with other sequences

### Bolt Locks

- Modular by design
- Universal mounting footprint
- Switch / Sensor Integration

### Railway Locking Device

- Specifically designed application
- Points, Signals & Loading Control
- Tamperproof & Robust

## Safety by design

Alcatraz Interlocks has a complete selection of Mechanical & Pneumatic Drive & Control Systems  
Reach out to us to know more!

- » Remote distance mechanical valve control.
- » Local pneumatic handheld valve control.
- » Remote distance pneumatic valve control.

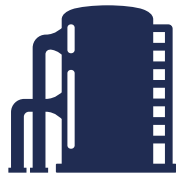

## Our Applications

Unlock the potential of your process with Alcatraz Interlocks: Our comprehensive range of mechanical and electro-mechanical solutions are designed to optimize the performance and operations of your valve systems, and the associated process needs. With our long history of product development, asset management and training programs, Alcatraz

Interlocks helps you to reduce operational risk, minimize environmental and human factors, extend the life cycle of your assets, and unlock the potential within your process. Our team of engineering experts, work closely with yours, to ensure long-term operational efficiency and continuity for your Maintenance & Shutdown needs.

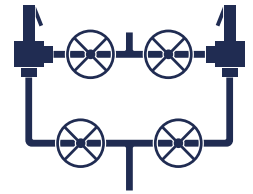

**Pig Traps**

**Tank Farm & Storage Solutions**

**Flow Control**

**Pressure Safety Valve System**

## Working with Alcatraz

### Innovation

With our dedicated R&D team, we strive to continuously develop our products. While bringing new ideas & solutions to market, for the forever changing process needs.

### High Quality

Our Engineering, Manufacturing & Services are renowned for their high quality. It's a priority within our organization, to ensure it stays high.

### Local Presence

We are continuously expanding our worldwide network of local service centres. Supporting our clients with sales, project management, and site service requirements.

### Service Excellence

A continuous service excellence program drives us. Providing the best possible services at each stage of your project.

## Service

In need of support?  
Our team of service experts are available to assist you with. Measuring, Installation, Commissioning, and Preventive Maintenance matters. To ensure the safety and performance of your people, processes, and environment. We are dedicated in providing the best technical support & aftersales.

Contact us today, to discuss how we can support.
